Location of Application

1. The location of the subject application has changed. The subject application is now located in Group 1650, Art Unit 1655, and has been assigned to Primary Examiner Bradley L. Sisson.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 19-22, drawn to a method for detecting a nucleic acid, classified in class 435, subclass 6.
- II. Claims 15-18, drawn to a nucleic acid-based complex, classified in class 536, subclass 23.1.

3. The inventions are distinct, each from the other because of the following reasons:

4. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process such as an immunoassay, a sequencing assay, or a hybridization assay that does not require multiple ligands as required in claim 18.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claims Renumbered

8. Attention is directed to the duplication of the numbering of claims 12-17. As accorded under 37 CFR 1.126, repeated claim numbers 12-17 have been renumbered 18-22. No correction to any dependency has been made. Applicant is urged to consider filing a preliminary amendment redirecting the dependency of claims 19-22 should such be desired.
